

ENGINEERING

Transitioning employees from academic achievement to practical applications

Presented by PreProcess, Inc.

Featuring the essential building blocks of process engineering in an active and hands on three day bootcamp. Customized at your site or available at locations throughout the year. Curriculum includes:

Project Leadership

- Safety
- Cost Estimating
- Schedule
- Documents

Process Piping

- Pumps and Compressors
- Valves
- Piping Systems
- Instruments

Utilities

- Cooling Towers
- Air Compressors
- Steam Boilers
- Scrubbers

Process Development

- Measurement
- Test Method Validation
- Design of Experiments
- Data Analysis

Vessels, Reactors, & Exchangers

Solids

- Solids Handling and Transport
- Slurries
- Solids Liquid Separation

Equilibrium Staged Separations

- Distillation
- Stripping
- Adsorption
- Ion Exchange
- Liquid Liquid Extraction
